

# **KPT-300LMC**

## **License Management Client**

### **Quick Start**

## < Procedure for Applying for an Account Registration License Key (Online)>

### General

This document contains the step by step procedure for Applying for an Account Registration License Key while online.

**Note:** KPT-300LMC Account Registration Setup is required prior to Authenticating a Radio Feature License Key.

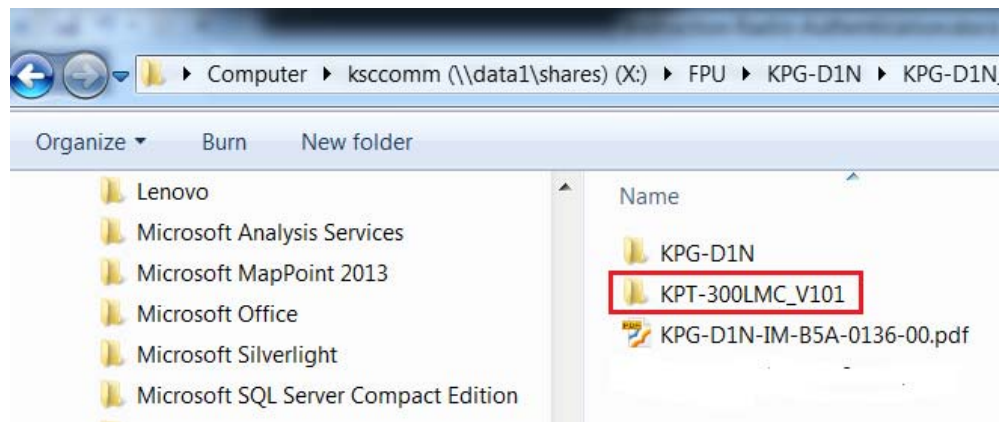

### Materials

- Account Registration License Key file (\*.jkefa)
- KPT-300LMC (License Management Client)

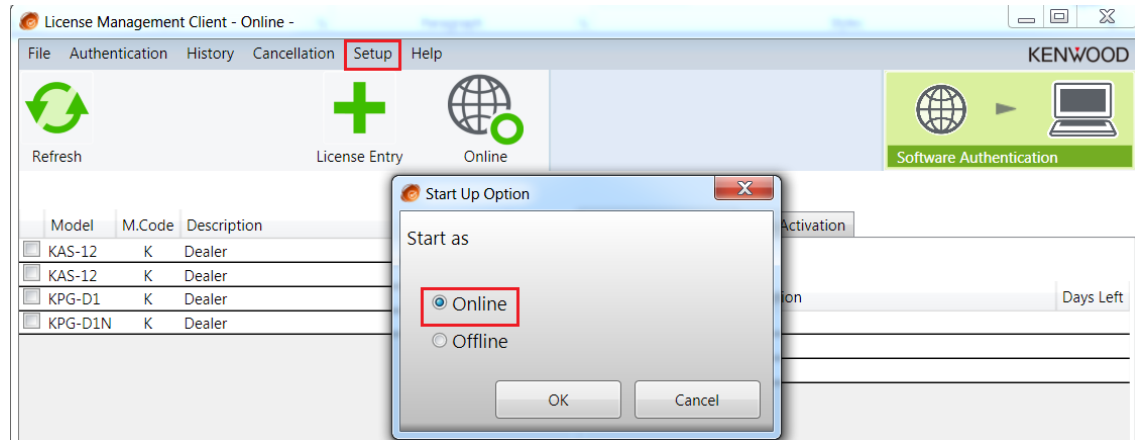

### Step by Step Instructions

Step 1: Open the KPT-300LMC software

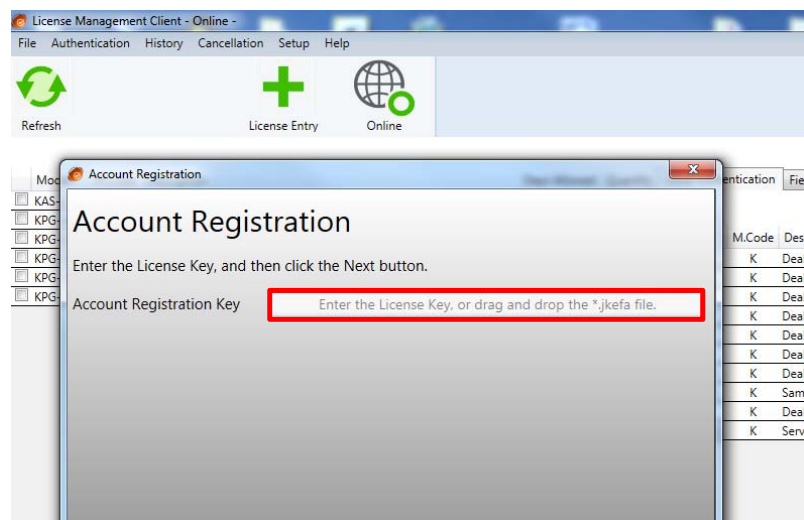

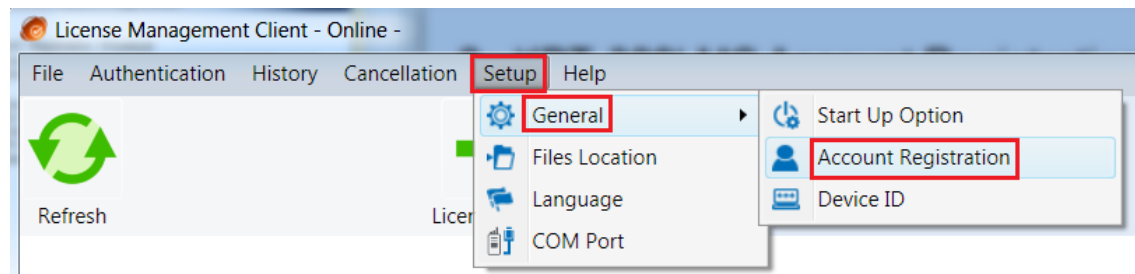

The KPT-300LMC software is located in the same directory as the KPG-D1N software, see screen shot below. Double click on “Setup.exe” to launch KPT-300LMC

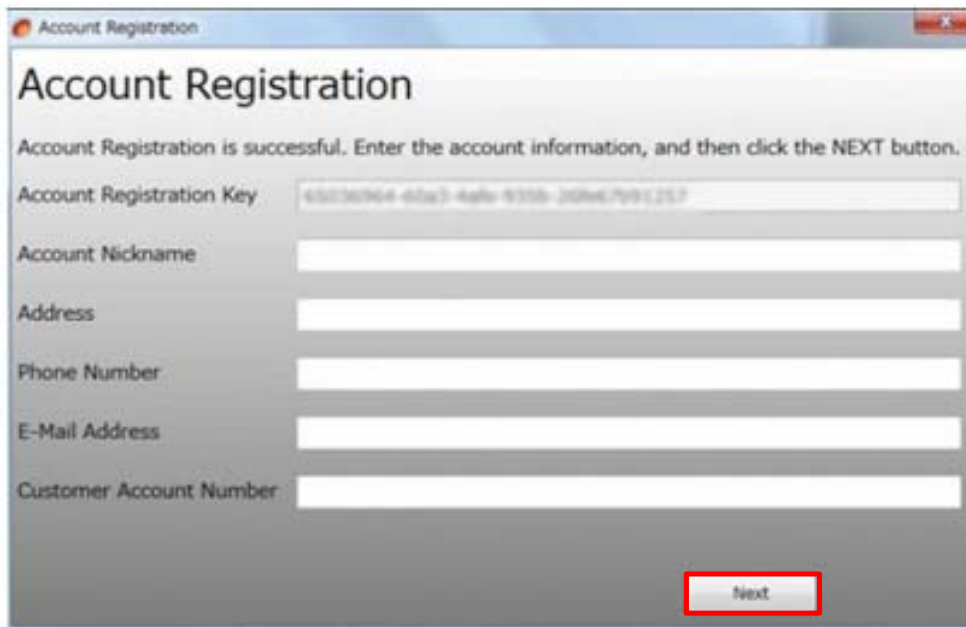

Step 2: Confirm that your PC is connected to the internet then open the KPT-300LMC and confirm that the Online condition is selected.

Step 3: In the KPT-300LMC under Setup/General/Account Registration you will find the Account Registration window. Drag and Drop the Account Registration Key File (\*.jkefa) into the Account Registration window or input the 32 digit Account Registration Key Number manually.

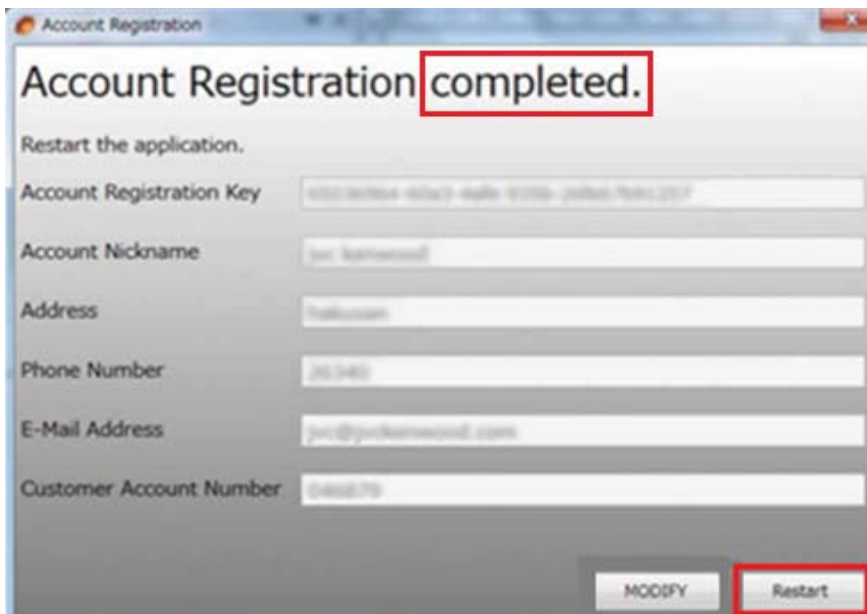

Step 4: Complete the required fields in the Account Registration window, then hit the “Next” button

The screenshot shows a window titled "Account Registration". Below the title bar, the text "Account Registration" is displayed in a large font. Below this, a message states: "Account Registration is successful. Enter the account information, and then click the NEXT button." There are seven input fields: "Account Registration Key" (containing a long alphanumeric string), "Account Nickname", "Address", "Phone Number", "E-Mail Address", and "Customer Account Number". At the bottom right, a button labeled "Next" is highlighted with a red rectangular box.

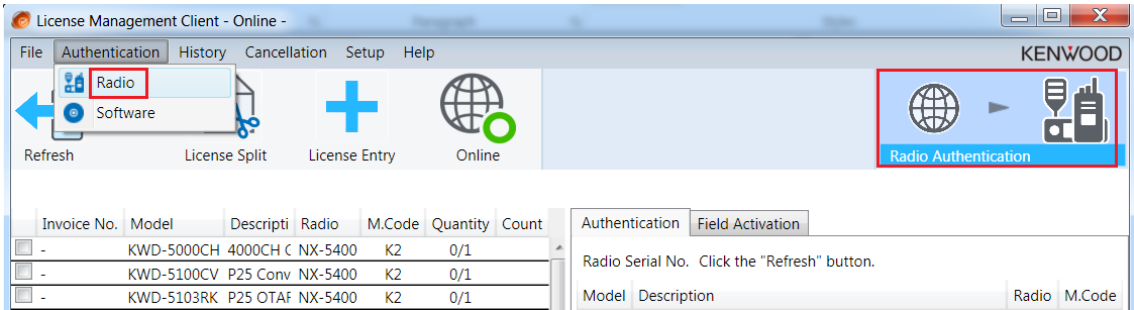

Step 5: The Account Registration window should now say completed, hit the Restart button.

The screenshot shows the same "Account Registration" window, but the text "Account Registration" is now followed by "completed." in a large font. Below this, the text "Restart the application." is displayed. The same seven input fields are present, now containing the following values: "Account Registration Key" (same as before), "Account Nickname" (joe), "Address" (123456789), "Phone Number" (25345), "E-Mail Address" (joe@jockhennet.com), and "Customer Account Number" (0000000). At the bottom right, there are two buttons: "MODIFY" and "Restart". The "Restart" button is highlighted with a red rectangular box.

Step 6: Under Authentication you will now see “Radio” and not just “Software”

This completes the Account Registration Procedure

## < Procedure for Authenticating a Software License Key (Online)>

### General

This document contains the step by step procedure for Authenticating a Software License Key while online.

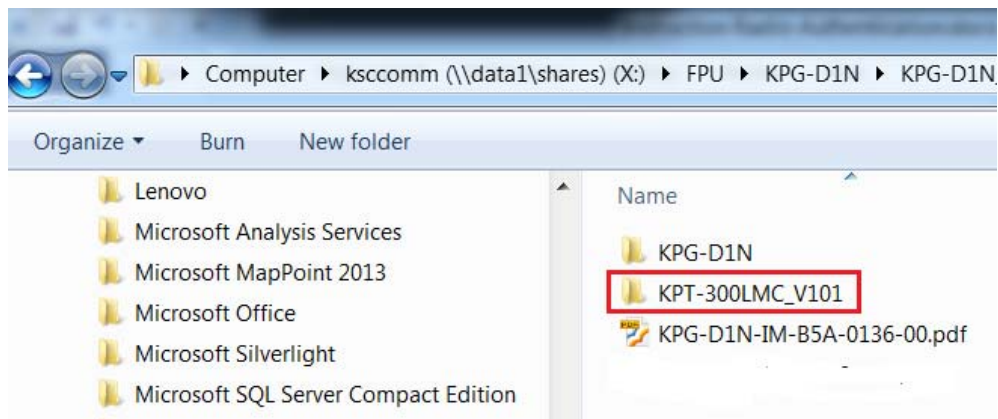

### Materials

- Software License Key file (\*.jkefs)
- KPT-300LMC (License Management Client)

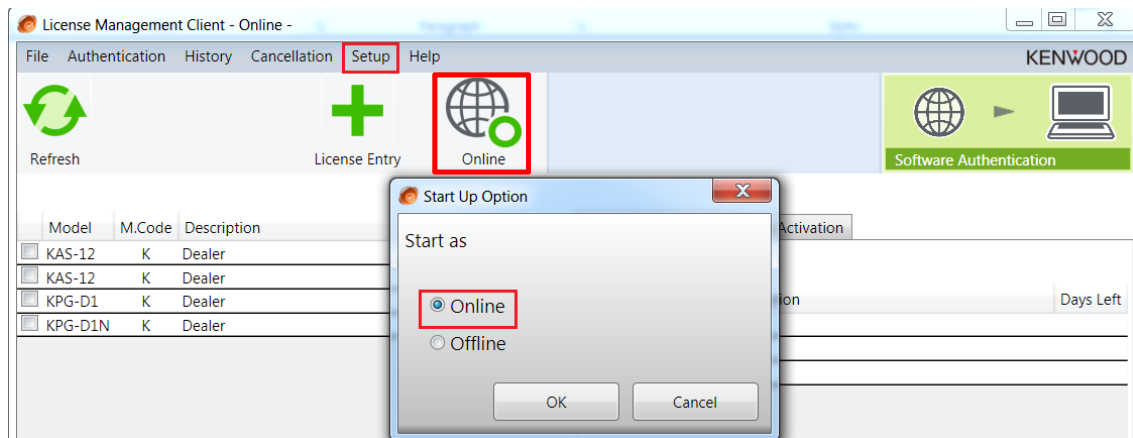

### Step by Step Instructions

Step 1: Open the KPT-300LMC

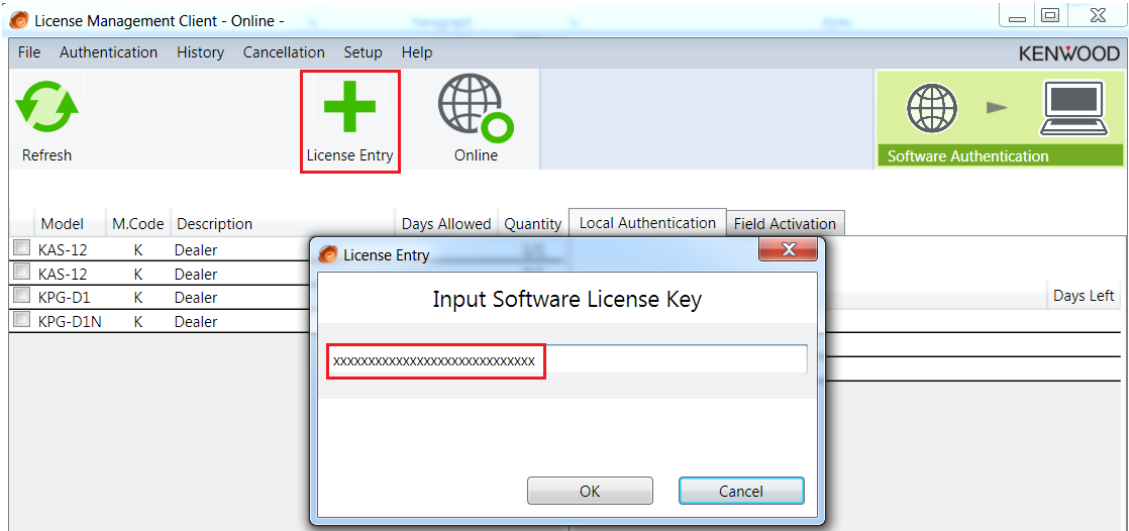

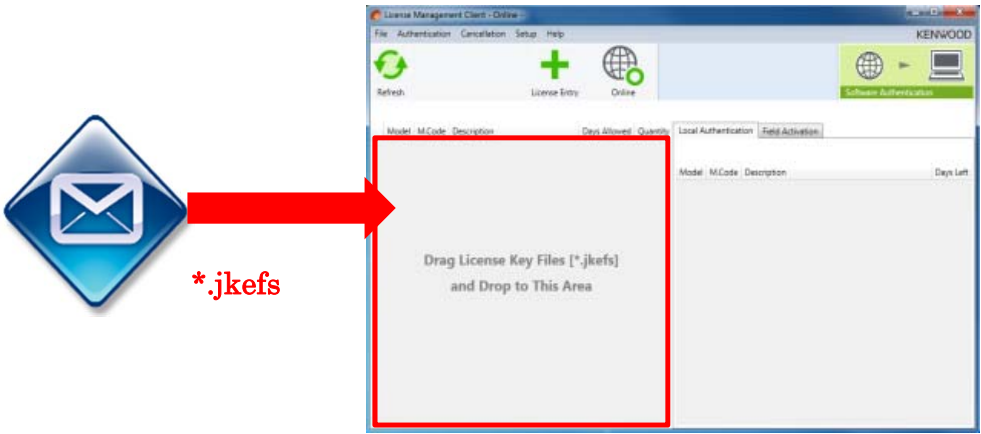

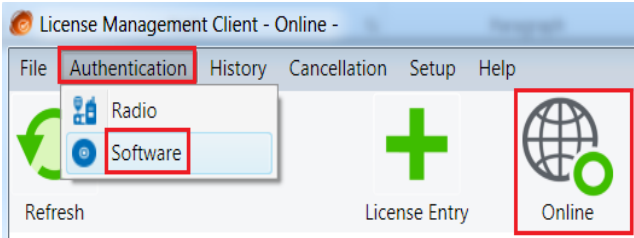

The KPT-300LMC software is located in the same directory as the KPG-D1N software, see screen shot below. Double click on "Setup.exe" to launch KPT-300LMC

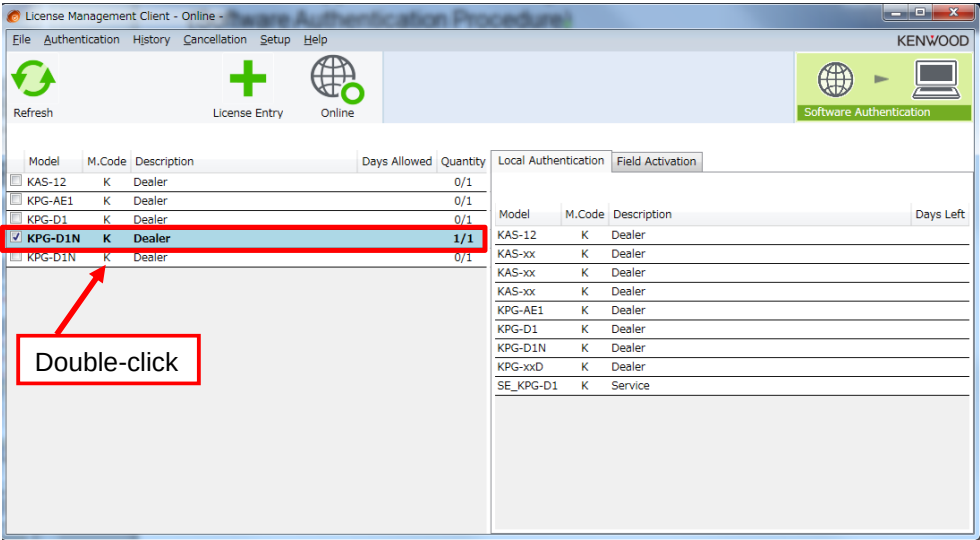

Step 2: Confirm that your PC is connected to the internet then open the KPT-300LMC and confirm that the Online condition is selected.

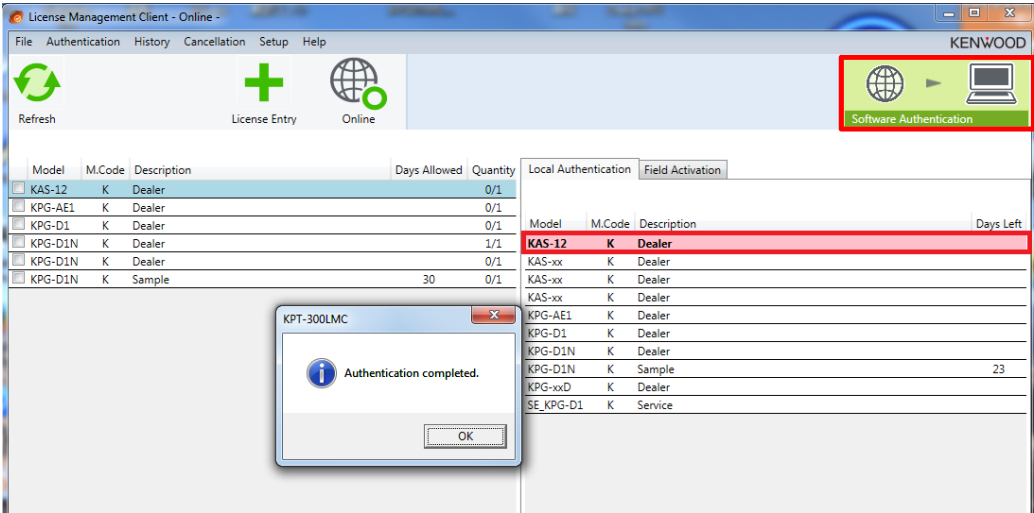

Step 3: In the KPT-300LMC select “Software” under Authentication then drag and drop the Software License key files (\*.jkefs) into the left side of the KPT-300LMC window. Or one could manually enter the Software License Key number in the License Entry window.

Step 4: After dragging and dropping the License Key file to the left side of the KPT-300LMC select the License Key to be authenticated by double clicking the box.

Step 5: Click the "Software Authentication" button on the right side to complete the authentication. The following confirmation window will appear and the authenticated License key will appear on the right side in red.

## <Procedure for Authenticating a Radio Feature License Key (Online)>

### General

This document contains the step by step procedure for Authenticating a Radio Feature License Key while online.

**Note:** KPT-300LMC Account Registration Setup is required prior to Authenticating a Radio Feature License Key.

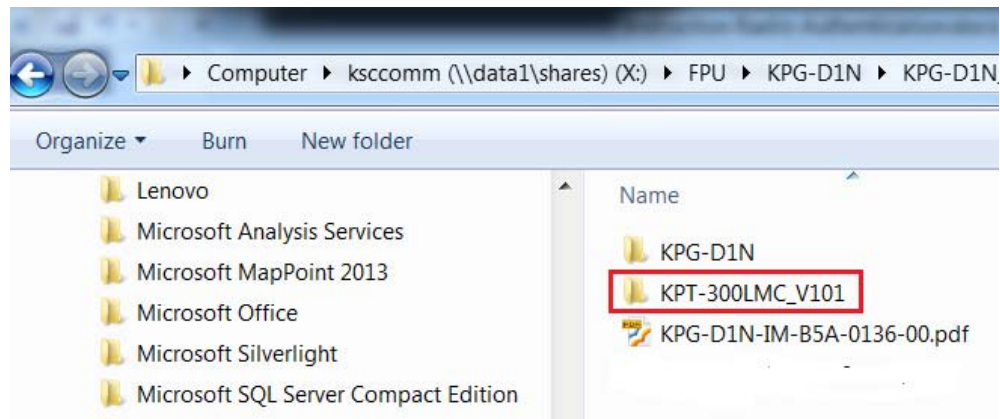

### Materials

- Radio Feature License key file (\*.jkefr)
- KPT-300LMC (License Management Client)

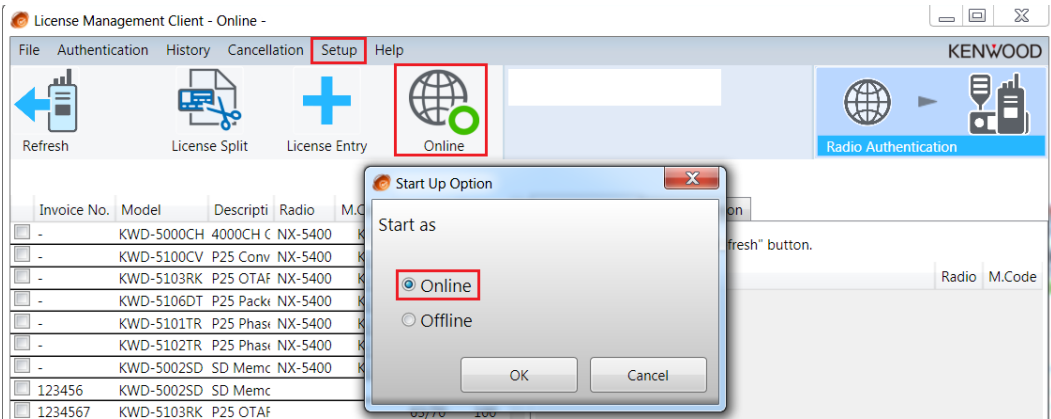

### Step by Step Instructions

Step 1: Open the KPT-300LMC software

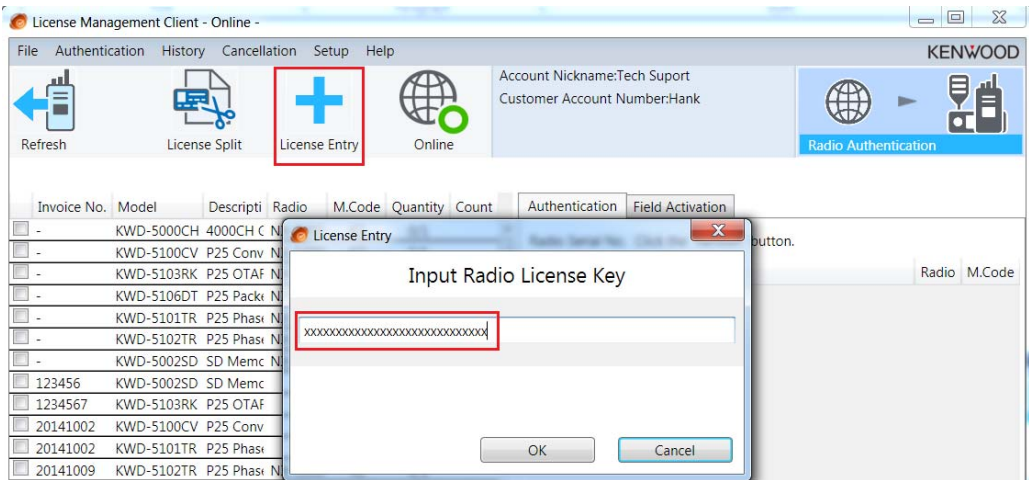

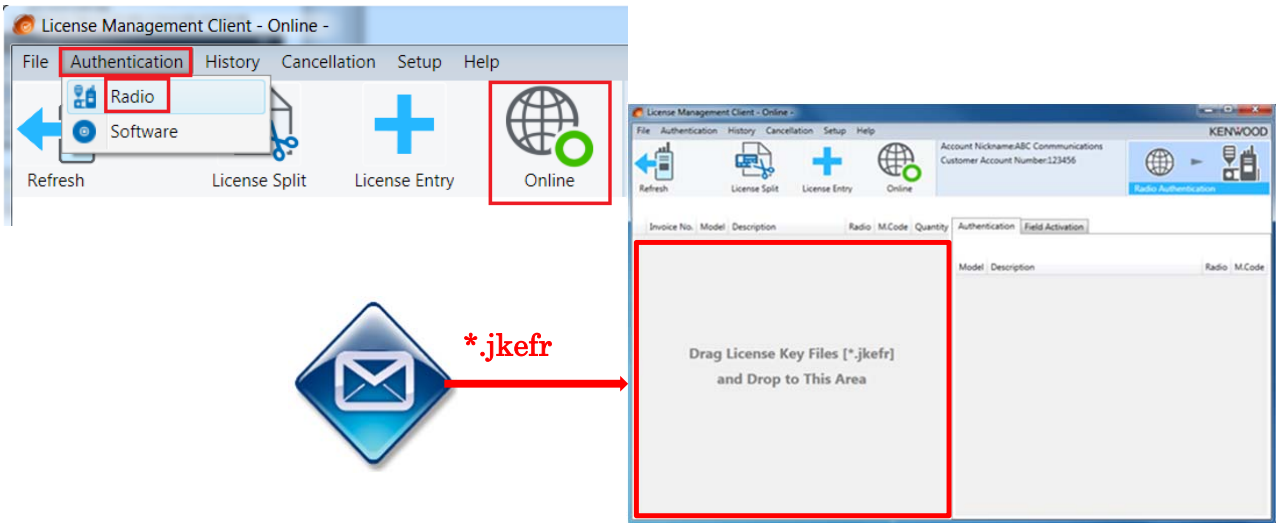

The KPT-300LMC software is located in the same directory as the KPG-D1N software, see screen shot below. Double click on “Setup.exe” to launch KPT-300LMC

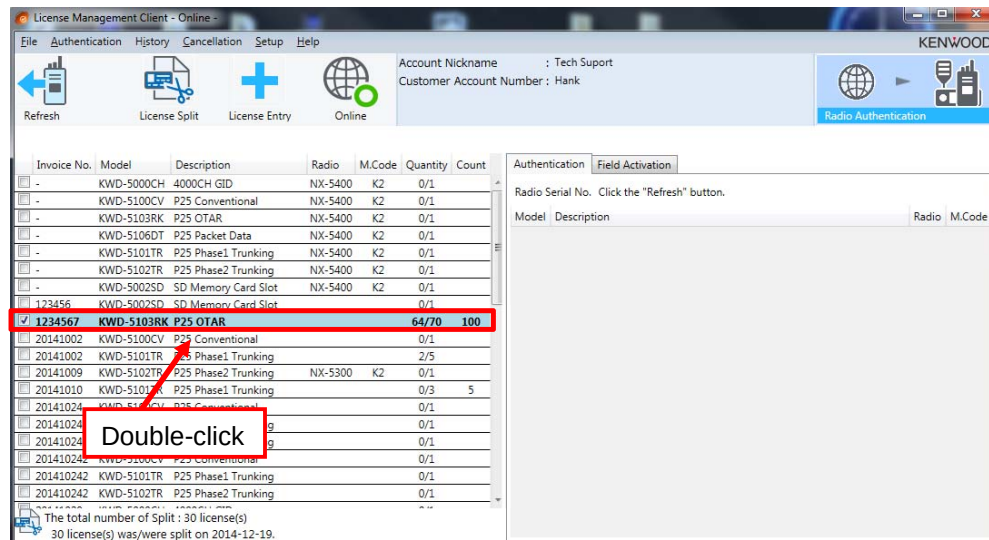

Step 2: Confirm that your PC is connected to the internet then open the KPT-300LMC and confirm that the Online condition is selected.

Step 3: In the KPT-300LMC select "Radio" under Authentication then drag and drop the Radio License key files (\*.jkefr) into the left side of the KPT-300LMC window. Or one could manually enter the Radio License Key number in the License Entry window.

Step 4: After dragging and dropping the License Key file to the left side of the KPT-300LMC select the License Key to be authenticated by double clicking the box.

Step 5: Click the "Radio Authentication" button on the right side to complete the authentication. The following confirmation window will appear and the authenticated License key will appear on the right side in red.
